DETAILED ACTION

1. Claim 11 and 14-27 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a system for multiplexing input data to SONET/SDH frame using concatenation. The prior arts in the record fail to teach or make obvious to a system comprising the copy machine to control and coordinate the operation of the input RAM, the crossbar and the output RAM in accordance with a schedule wherein the overhead bytes include sequence numbers and the calendar, the schedule and the sequence numbers are each double buffered and switched in a predetermined sequence so as to allow hitless re-provisioning within a structure of the claim. These features are claimed in the independent claim 11 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
